Professional Summary

A results-driven Senior Software Engineer with 4 years of experience designing and developing robust, scalable web applications using **Angular**, **React**, **Node.js**, and **.NET**. **Microsoft** Certified in **Azure AI Fundamentals** and **GitHub Copilot** with hands-on experience integrating **OpenAI** APIs to drive code generation, refactoring, and legacy modernization. Delivers secure, user-centric solutions across healthcare, IoT, and telehealth domains—integrating RESTful and GraphQL APIs and implementing role-based authentication—while continuously adopting emerging AI-driven tools to enhance development speed and performance.

Skills

Frontend Technologies: React, Angular, Next.js, HTML, CSS, SCSS, Material UI, Bootstrap, Tailwind, Keycloak.

Backend & APIs: Node.js, .NET, RESTful APIs, JSON, HTTP requests, GraphQL.

AI Tools & Integration: OpenAI API, Claude, GitHub Copilot, Azure AI, AI-driven code generation & refactoring, prompt engineering.

Programming Skills: JavaScript, TypeScript, C#, C++, Python, Java.

Version Control & DevOps: GitLab, Gerrit, Docker, Tomcat, Jenkins, CI/CD.

Testing & Debugging: Unit Testing (Jasmine, Karma), Jest, Debugging Tools.

Data & Tools: Qlik Sense, SQL, Jira.

Soft Skills: Teamwork, Communication, Time Management, Presentation Skills.

Experience

EY GDS, Pune, Maharashtra

September 2025 - Present

Senior Software Engineer

- Developing full-stack features for legacy application modernization—building **Angular** front-end components while contributing to backend services in **.NET** and **C#**—accelerating delivery across the stack.
- Leveraging **GitHub Copilot** with custom instructions and reusable **prompt** templates to automate recurring development tasks, improving code consistency and personal throughput.
- Engineering **OpenAI API** integrations for automated code generation and refactoring within legacy projects, streamlining the development lifecycle and reducing manual effort.
- Collaborating with cross-functional teams to define integration requirements and successfully implementing **AI-driven** solutions for code refactoring and generation.

TATA Elxsi, Bangalore, Karnataka

November 2022 - July 2025

Software Developer

Baxter (Onsite), Bangalore

Jan 2025 - July 2025

- Developed responsive, accessible UI components for a secure healthcare portal using Angular 19, Tailwind CSS, SCSS, and **TypeScript**, with **Keycloak**-based authentication enabling secure login flows and role-based UI rendering for administrators and general users.
- Integrated **GraphQL** APIs for real-time events and notifications (using introspection for query design in Postman) and built a custom video streaming module with **Shaka Player**, managing state reactively via **RxJS**.
- Enabled dynamic multi-hospital deployments through environment-specific JSON configs, and built key UI features (debounced search, filtering, sorting) with component-based data communication via **@Input/@Output** and shared services; wrote Jest unit tests for coverage and maintainability.

Ooredoo, Qatar - IoT Device Web Portal

Feb 2024 - Dec 2024

- Developed a large-scale IoT portal for real-time device tracking and status visualization using **Angular 16**, with a JWT-based authentication module enabling secure login, session management, and role-based access restriction.
- Integrated **Google Maps** API, Ericsson Aeris APIs, and **Node.js** for real-time geolocation updates, and used **RxJS** for live data binding across reusable, responsive UI components.
- Managed deployments with Docker and code versioning with GitHub; applied **Jasmine & Karma** for unit testing within Agile processes tracked in Jira.

TEngage – Telehealth Platform

Feb 2023 - Jan 2024

Built a telehealth web solution to facilitate real-time communication between patients, doctors, and hospital staff.

- Developed modular and accessible UI components using **React (JSX)**, **HTML**, **SCSS**, and **ES6**, styled with **Material UI** and **Bootstrap**.
- Integrated Amazon Chime SDK** to enable **secure video conferencing** and virtual consultations.
- Consumed and managed **RESTful APIs** for real-time appointment and messaging features.

Smart Clinical Trials Platform

Nov 2022 – Jan 2023

- Created responsive interfaces using **HTML**, **SCSS**, **Material UI** and **Angular 16** for managing pharmaceutical trial data.
- Maintained **JSON-based** data flow and performed unit testing to ensure reliability.

Diagonal.ai, Bangalore

August 2022 - October 2022

Data Analyst

- Built KPI dashboards in Qlik Sense using real company datasets.

Education

- MVJ College of Engineering**, BE in Computer Science Engineering, 2018–2022, Bangalore, Karnataka, India.
- Kendriya Vidyalaya No.2 Jhansi Cantt**, CBSE Class XII, 2017–2018, Jhansi, Uttar Pradesh, India.
- Mother Sita Public School**, CBSE Class X, 2015–2016, Jhansi, Uttar Pradesh, India.

Achievements and Certifications

- [Microsoft Certified: Azure AI Fundamentals](#)
- [GitHub Copilot](#)
- Awarded with EY **Extraordinary YOU – Achiever Extraordinaire, EY GDS – Jun 2026**
Recognized for exceptional performance and outstanding contribution.
- Extra Mile Award, TATA Elxsi – Aug 2023**
Awarded for outstanding performance, contribution, and perseverance in delivering impactful results.
- AWS Cloud Masterclass - Cloud Practitioner Essentials (Self-Placed) FutureSkills Prime.
- Additional Learning:** JavaScript, ReactJS, Docker, Git, and RESTful APIs (LinkedIn Learning & O'Reilly).
